Electronic Communication Device Policy

ACCESS

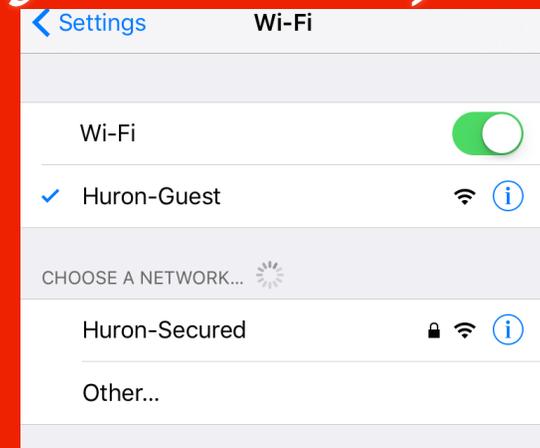

All students will now have the flexibility to bring a mobile type device to school to use for educational purposes. This device could be a laptop, tablet, smartphone, etc.

CONNECTING YOUR DEVICES

- As of April 4, 2016, we will be opening up the school public wifi.
- Students can connect their devices to the “Huron-Guest” wifi network.

STEPS-CONNECTING YOUR DEVICES

Connect your device to the 'Huron-Guest' wifi network using their personal mobile devices. *(This will look different on each specific device.)*

STUDENT REMINDERS...

Devices may be used in classrooms for educational purposes at the discretion of the classroom teacher. Potential applications include calendars, calculators, clocks, cameras, maps, voice recorders, and research tools.

STUDENT REMINDERS...

By bringing personal devices to school, users agree that, while within the school campus, they will access the Internet only via the District-provided wi-fi, and not via any cellular (3g, 4g) service or other internet wi-fi that may be available. Failure to follow this requirement is a violation of the Code of Conduct and subject to disciplinary action.

STUDENT REMINDERS...

Users must understand that all personal devices and equipment are brought into the school at their own risk. The District is not responsible for loss, theft, or damage of personal equipment.

STUDENT REMINDERS...

Students will not be provided the ability to charge devices, as electrical cables will create a safety hazard. As such, students should make sure devices are charged before bringing them to the school.

THESE DEVICES MAY NOT!!!

1. Disrupt the education process in the school district.
2. Endanger the health or safety of any student or anyone else.
3. Invade the rights of others at school.
4. Involve illegal or prohibited conduct of any kind.
